World Motor Vehicle Data Is Available on Diskettes

This publication is available on non-protected diskettes formatted for use with Lotus 1-2-3, Version 2. These diskettes can be used on any IBM personal computer or compatible microcomputer. Diskettes are available for the entire book or in five separate sections.

Prepayment is required with your order. Please make your check or money order payable to Motor Vehicle Manufacturers Association of the U.S., Inc. Orders received without payment will be returned.

Any additional questions regarding the diskettes' content or format should be directed to Bernice Baker (313) 872-4311.

PRICE INFORMATION

PRESIDENT'S MESSAGE

This, 23rd annual edition of *World Motor Vehicle Data* contains more information about the worldwide motor vehicle industry than ever before. Additional tables have been added to make this edition an even more valuable resource document.

World Motor Vehicle Data continues to be one of the most important and reliable sources of information on production, imports, exports, registrations and sales of motor vehicles around the world.

Thomas H. Hanna
President

PREFACE

This statistical compilation of international motor vehicle data through 1985 includes production totals by manufacturers as well as by country. Since it is necessary to use different data sources from year to year, there are occasional differences in the number reported for various classes of vehicles for some countries. This is due to the lack of uniformity of definitions for certain vehicles. In such cases, car, truck and bus data vary from one source to another and, accordingly, in the year to year data reported.

Although special efforts have been made to segregate vehicle assembly data from production data, the world totals for production may include some duplication since it is not possible for all countries to identify assemblies from production.

The data in this report were supplied by foreign government agencies, trade associations, private services and the press. It should be noted that the basis on which the data are reported will vary. For example, vehicle output may be measured in terms of production, shipments, or factory sales. New vehicles sold may be measured in terms of retail sales or new registrations. Imports and exports are subject to problems of compilation and definition. As a result, data accuracies vary and international comparisons are, of course, affected by these discrepancies.

Data compiled by MVMA from various overseas sources. Information was obtained from published reports issued by various vehicle associations outside the U.S. and from a number of other sources considered reliable. Therefore, and because of the numerous complex factors involved in determining vehicle ranking worldwide, MVMA does not assume responsibility for the above classification.

NOTE: All the amendments and corrections reported in the 1985 monthly issues of the Naamsa Car Sales Returns have been incorporated in the 1985 Cumulative Sales Return.

The use of the term "Variant" in the summary denotes that the model has more than one body type (ie. 2-door, 4-door and station wagon), on the market.

As a result of a company name change, sales previously reported under the heading Amcar Motor Holdings (Pty) Ltd and Ford Motor Co., were with effect from August, 1985, reflected under SA Motor Corporation (Pty) Ltd.

NOTE: The above table contains Motor Vehicle exports as counted by the Motor Manufacturers. Differences between the figures of Export Allocation of Production and the export figures collated by Customs and Excise arise from Customs classifying some countable KD sets as "Parts and Accessories", rather than as Vehicles, because of difficulties in identifying certain shipments. Also includes categories of unassembled vehicles not counted by the manufacturers.

* 1970-1985 data for Great Britain.

NOTE: From October 1982 all general goods vehicles less than 1525 Kgs. unladen weight are assessed for vehicle excise duty at the same rate as private vehicles. The previous private car & van taxation class has been replaced. The above figure shows for the first time registrations by actual body type. The 1982 figures are not comparable with previous years.
